**Chemetall to Exhibit Advancements in Metalworking and
Surface Treatment at Eastec 2015**

New Providence, NJ – Chemetall, a leading developer, manufacturer, and supplier of state of-the-art specialty chemical products will present at Eastec 2015 on May 12 to 14, 2015 at the Eastern States Exposition in West Springfield, MA.

Chemetall, the recent recipient of Frost and Sullivan’s North American Metalworking Fluids New Product Innovation Award, will have technical experts on site at booth #3347 in Building 3 to address manufacturer’s chemistry needs and advise attendees on the latest advancements in surface finishing and metal fabrication. Chemetall’s dedication to innovation and overall process cost reduction begins with the machining and stamping operations, and continues through the cleaning process and subsequent treatments, including rust protection and paint pretreatments.

“We are very pleased to return to Eastec and share with the attendees our comprehensive approach to Cut It, Clean It, Coat It, Control It, Conserve It, providing our partners a true start to finish confidence level for their process solutions” shared David Enright, Business Manager for Metalworking. “This integrated approach assures improved performance along with consistent and reliable fluid management. Eastec offers Chemetall the opportunity to be face-to-face with our local customers and communicate how advancements in coolants and allied chemical programs can improve both quality and productivity, reduce waste and significantly improve the workers environment.”

In addition to next generation metalworking fluids free of registered biocides, Chemetall will feature their line of advanced pretreatment products designed to eliminate phosphate, heavy metals and sludge, operating at lower temperatures while delivering outstanding paint performance.

Chemetall has been developing, manufacturing, and supplying state-of-the-art specialty chemical products for over a century. The ISO 9001 company offers a wide spectrum of products ranging from metalworking fluids and drawing & stamping compounds to cleaners, rust preventatives and surface treatment chemistries. Chemetall’s integrated products, chemical management systems, process equipment, and technical service programs deliver efficient and cost effective solutions for industrial manufacturing needs. Expect More with Chemetall.

About Albemarle

Albemarle Corporation, headquartered in Baton Rouge, Louisiana, is a premier specialty chemicals company with leading positions in attractive end markets around the world. With a broad customer reach and diverse end markets, Albemarle develops, manufactures and markets technologically advanced and high value added products, including lithium and lithium compounds, bromine and bromine derivatives, catalysts and surface treatment
