Environmentally-Friendly Oxsilan® CR 100 Paint Pretreatment Wipes Offer Ease-of-Use

New Providence, NJ – Chemetall has announced the launch of Oxsilan CR 100 Paint Pretreatment Wipes. Developed with an environmentally-friendly technology, these lint-free cloths are metal-free, fluoride-free, and pH neutral. The wipes, which are compatible with multiple substrates, provide enhanced paint adhesion and corrosion resistance.

OEM automotive body paint shops utilize Oxsilan CR 100 to pretreat sanded paint defect areas without the use of special primers. For general industries, the wipes can also be used to pretreat sanded paint imperfections without repeating the pretreatment process.

Oxsilan CR 100 wipes are conveniently available in rolls of 200 wipes or in boxes of 500 individually-packaged wipes. The application process is simple and takes seconds: wipe the area to remove any residuals left from sanding, as well as to apply a thin Oxsilan film, and allow the area to dry.

"Oxsilan CR 100 Wipes were engineered with the worker in mind," explained Julia Murray, Vice President of Technical Marketing. "The simple application process and the composition of the wipes make them easy to use. That user-friendliness, combined with the product's high performance, makes Oxsilan CR 100 Wipes the paint pretreatment of choice."

Chemetall has been developing, manufacturing, and supplying state-of-the-art specialty chemical products since 1909. The ISO 9001 company offers a wide spectrum of products ranging from metalworking fluids and drawing & stamping compounds to cleaners, rust preventatives and surface treatment chemistries. Chemetall's integrated products, chemical management systems, process equipment, and technical service programs deliver efficient and cost effective solutions for industrial manufacturing needs.

Chemetall is a world-class specialty chemical company and a global provider of chemical technologies based in Frankfurt/Main, Germany. In addition to the North America headquarters in New Providence, New Jersey, other locations in the Americas include Jackson, Michigan; LaMirada, California; Bramalea, Ontario; Queretaro, Mexico and Jundiai, Sao Paulo Brazil. Chemetall is a division of Rockwood Holdings Inc., a global specialty chemicals and advanced materials company traded on the New York Stock Exchange.
