Chemetall Oakite FiSan FBO is the heavy-duty alkaline cleaner for hot tank applications

New Providence, New Jersey -- Chemetall Oakite, a leader and innovator in cleaners and sanitizing chemistries, introduces Chemetall Oakite FiSan FBO, a heavy-duty alkaline cleaner for immersion cleaning applications.

Vice-President of Technical Marketing, Julia Murray, explained, "Chemetall Oakite FiSan FBO is extremely effective, both in performance and cost, in the emulsification of oils and removal of burnt carbon. Thus, Chemetall Oakite FiSan FBO is ideal for the boil-out of deep fat fryers, the cleaning of open processed food vats, and the elimination of carbon burnt on heating coils."

Chemetall Oakite FiSan FBO's special formulation of surfactants, alkalies, base, and water conditioners is also successfully utilized in soak operations of food processing equipment. The USDA has authorized Chemetall Oakite FiSan FBO for use in federally inspected meat and poultry plants.

Chemetall Oakite, with headquarters based in New Providence, NJ, has been developing, manufacturing, and supplying state-of-the art specialty chemical products since 1909. The QS9000/ISO 9001 certified company offers a wide spectrum of products ranging from cleaners, sanitizers, chain lubes, additives, and defoamants to complete available water and waste treatment programs. Chemetall Oakite's integrated products, chemical management systems, process equipment, and service programs facilitate the achievement of many industries' processing needs.

Chemetall Oakite, a world-class specialty chemical company with subsidiaries throughout the world, is a member of the Chemetall GmbH Group, a renowned international corporation.
