

CODACS™ and CODACS Coolant Tracker

Chemetall's Original
Data Acquisition and
Control System

Visibility increases value

Chemetall's Process Engineering and Equipment offers CODACS and CODACS Coolant Tracker. These high-performance data acquisition, logging, control, and reporting systems create process visibility, so you can clearly see how your processes are functioning. In fact, the only way to enhance process efficiency is to see clearly.

Customer benefits

- ⊕ Maximize output.
- ⊕ Increase efficiency.
- ⊕ Improve productivity.
- ⊕ Reduce downtime.
- ⊕ Gain cost savings.
- ⊕ Monitor, maintain, and control your processes anytime from anywhere!

See Clearly with CODACS™

In manufacturing, process visibility is fundamental for success. You need to clearly see your key performance indicators. Chemetall's Process Equipment and Engineering offers equipment and systems to monitor, control, dispense, and treat your chemical processes. **CODACS (Chemetall's Original Data Acquisition and Control System), CODACS Coolant Tracker, and Data Hawk** are high-performance, real-time data acquisition, logging, and control systems.

Clearly see your processes

- + Collect raw data and see high-value information in proper context.
- + Easily see data in a user-friendly interface.
- + Identify and address issues quickly.
- + Enhance process efficiency.
- + See what you need to see.
- + Control what you need to control.
- + Reduce waste.

Your needs are unique

Each and every CODACS and CODACS Coolant Tracker system is custom designed and installed according to customer needs. Successful system implementation is achieved with a step-by-step approach, so you can immediately realize benefits without disruption. First, connectivity is established, to synchronize the data transfer between your controls and devices. Next, we broaden the scope at the appropriate speed, and steadily add sensors to gain more and more process information.
